

## Practical Instructions

Here you will find information to help you do the idea of "Kla.TV-Offline".

Merely 5 steps are required.

**1.**

The entire international package fits on a 2 TB hard drive. If you can manage, get two of these external hard drives.

**2.**

Now copy the contents of your hard drive onto these two drives. This may take several hours, depending on your technical equipping. If you can't manage the copying yourself, you'll surely find someone to help you.

### Notice

If you don't have "Kla.TV-Offline" on your hard drive yet, you can proceed as follows:

- a) Register at [www.kla.tv/vernetzung](http://www.kla.tv/vernetzung). We'll connect you with a local Kla.TV group and do everything we can to ensure you can copy the Kla.TV archive locally.
- b) You can download the archive via server access (SFTP). Depending on your internet speed, it may take several days to download the entire Kla.TV archive. All information is available at [www.kla.tv/offline](http://www.kla.tv/offline) under "Questions & Answers."

**3.**

Please check if the copying worked. Please do not change any of the hard drive's contents so that this strategy can truly reach all people in its original form!

**4.**

Kla.TV Offline is our strategy 2+. Pass it on to two reliable people and motivate these two that they would also pass the Kla.TV-archive on to two other people and so on. If possible, always pass the strategy on verbally. This way you will feel resonance and can sense if the person who was given the gift is enthusiastic about it, too, and will go for it.

## VERY IMPORTANT:

We ask you to make a definite committed check in 1-2 months to see whether your distributors passed their copied hard disks on to two other people. Motivate them to do this check as committedly with their two distributors. The distribution will only work this way!

5.

In order that you and we can actually track the spread, we've installed a tracking meter at [www.kla.tv/offline](http://www.kla.tv/offline). Please make your sharing known there. This meter will allow you to stay with it later on and follow up how the whole thing spreads internationally due to many enthusiasts.

//

*Kla.TV-Offline – that's fun !*

//

## Bonus variants

If you can't afford to buy two 2 TB external hard drives, you have the option of selecting individual or multiple languages and sharing them on smaller hard drives or USB-sticks, for example. It's important to always keep the "Read Me First" folder with it.

If possible, label the hard drives with "Kla.TV-Offline." The template is located in the same location as this document.

If you would like to have a better quality archive for yourself and can afford it, please use the options to do the downloading yourself at: [www.kla.tv/downloader](http://www.kla.tv/downloader). The respective storage requirements are specified there.

It's a good idea, as long as internet censorship still allows it, to keep the archive up-to-date with the latest broadcasts. You can find detailed instructions for this at [www.kla.tv/offline](http://www.kla.tv/offline) under "Questions & Answers."
